Professional Turnkey EPC
ENGINEERING-PROCUREMENT-CONSTRUCTION

Professional Turnkey EPC

and Integration Services for Energy Storage and Solar Projects

Welcome to SunGrid.

We're an independent company comprised of engineers, designers, and project managers committed to generating turnkey energy solutions for a better tomorrow. Our collective experience, dedication, and technical expertise in the "ENERGY REVOLUTION" since 2011 enables us to deliver intelligent, high-quality, and cost-effective solutions to our clients, for projects scaling from 250kw up to 200MW. We offer renewable energy solutions, energy storage solutions and on-site generation solutions.

EPC excellence

As a full-service, turnkey Engineering, Procurement, and Construction (EPC) firm, our highly-skilled team simplifies the process of bringing your custom energy solution to life—everything from consultancy and planning through to successful project execution. Our strong focus on value engineering implements cost-saving measures from day one of your new build; alternatively, if you're searching for energy savings within your existing infrastructure, we can engineer a thoughtful solution to begin offsetting these costs, now and over the long-term. SunGrid is an umbrella that can carry you through all stages from the gate to the plate.

Built around relationships, driven by solutions

To do what we do best, we work alongside the best. When you trust SunGrid for your energy project, you can trust that we've done our due diligence in cultivating relationships with suppliers and contractors that match our values, expertise, and our commitment to excellence. Those that are brought into the fold are done so because it's in the best interest of the finished project.

The Four P's

As a company, we adhere to four governing philosophies, or what we like to call the 4 P's:

Priorities

Safety is #1. There's nothing more important than sending our people and partners home safely to their families.

People

The success of any project ultimately comes down to the quality of people involved. High standards for recruiting and retaining top talent is paramount.

Projects

On-time and on-budget. Next to safety, completing great quality projects on-time and on-budget is our highest daily concern.

Partners

The majority of SunGrid business is repeat business. Turning both suppliers and customers into partners is critical to our long-term success.

Our Projects

Ontario • Over 150MWh of Global Adjustment Integration and EPC Services | Partner: Honeywell

New York • 12.5MWh NYSEDA BESS | Partner: Key Capture Energy (KCE)

Creating Better Energy For Tomorrow

SunGrid Solutions is focused on creating Better Energy for Tomorrow by focusing on projects scaling from 100kWh to 200MWh within the Energy Storage & Generation Space. Sungrid is able to invest in long term success with its customers by enabling their customers to focus on educated energy solutions that directly meets their individual needs.

Texas • 10MW, 10MWh BESS | Partner: Glidepath

Texas • over 100MWh of BESS Integration Services | Partner: Powin
