Essential O&M Programs

Operations and Maintenance program management and execution that ensures maximum asset value for the long term.

Welcome to SunGrid.

We're an independent company comprised of engineers, designers, and project managers committed to generating turnkey energy solutions for a better tomorrow. Our collective experience, dedication, and technical expertise in the "ENERGY REVOLUTION" since 2011 allow us to deliver and service high-quality, cost-effective projects over the complete project lifecycle.

Pictured: Texas Manufacturing Facility Engineering, Design, Integration for 100 MW/ 100MWh installation. Ontario: Over 100 MWh of assets under contract for O&M services with a global leader in infrastructure services.

Modern Fleet Vehicles: Our fleet of clean and well-maintained service vehicles ensures that SunGrid technicians always arrive on site with the necessary tooling required to service your assets properly and safely.

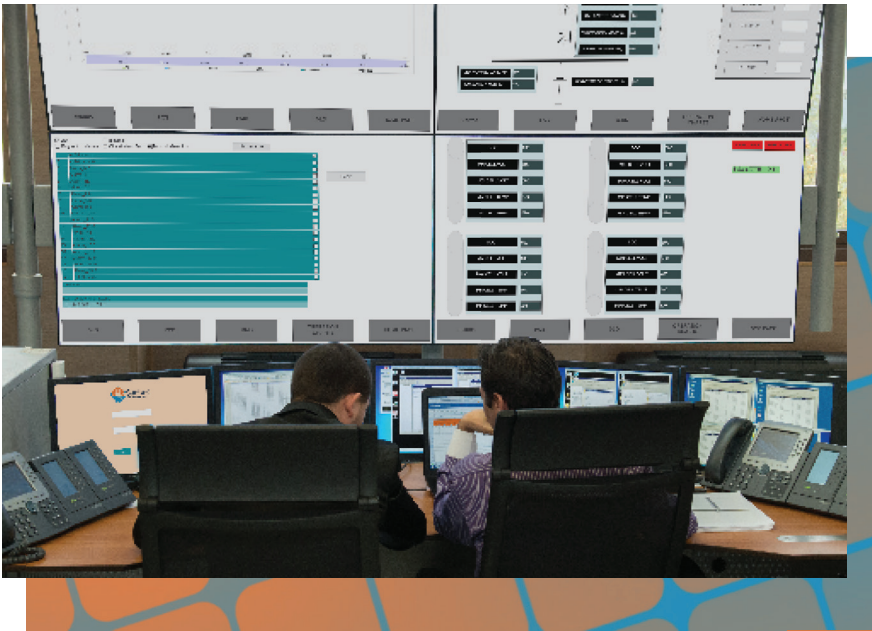

SunGrid delivers flexible, tailored O&M programs that maintain system quality, performance, and ensure equipment warranties are maintained.

These turnkey service capabilities cover:

- Management and execution of complete BESS operations and maintenance program
- Performance and availability structures
- Specific scope engagements ranging monitoring to field services
- Long-Term Service Agreement (LTSA) for full project lifecycle
- Master Service Agreements (MSAs) for T&M services
- Owners representative on-site services / construction monitoring & quality

Your Long-Term Service Partner

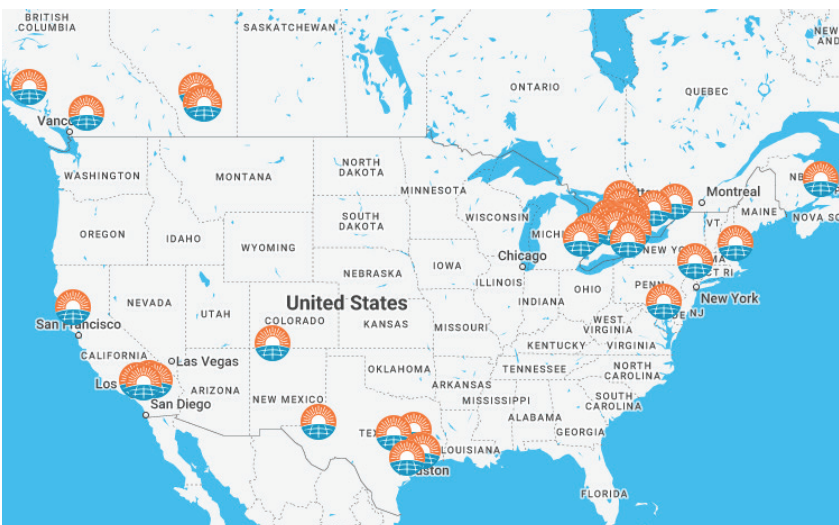

Dedicated services teams work with you to simplify the management, and execution of the complex variables associated with BESS projects.

Asset Monitoring and Performance Analysis: SunGrid offers dedicated 24/7 asset monitoring and technician dispatch, as well as integration into multiple SCADA systems.

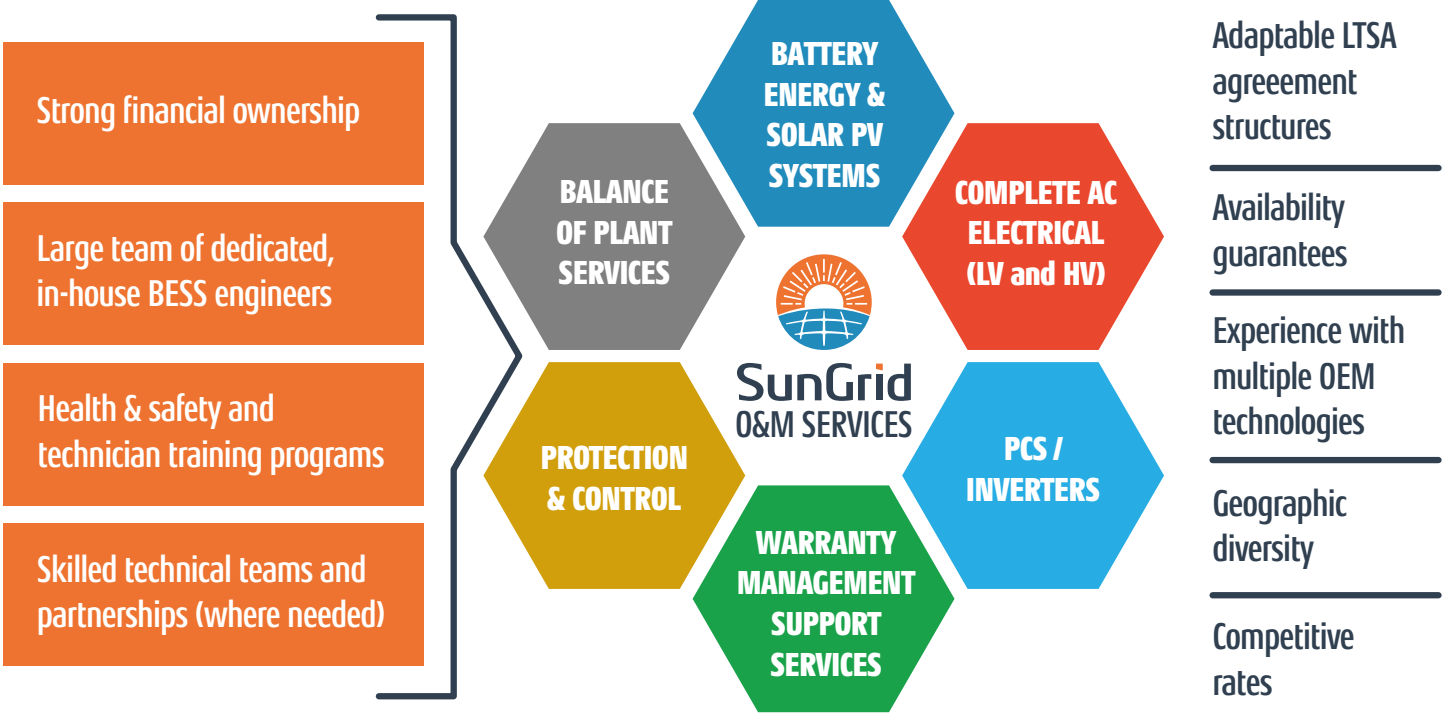

Service excellence to maximize asset value over the long term:

- Accredited energy sector services management team
- Dedicated service technicians located throughout North America
- Professional technician development and training programs
- Quality equipment, tooling, and vehicles
- Industry-leading Health and Safety program
- Diverse experience with numerous technologies, and manufacturers
- Medium and High-voltage services
- Protection and Control / SCADA field services
- Deep engineering team support services
- Spare parts recommendations and inventory management services
- Warranty support services

North American Coverage: With offices from coast to coast, SunGrid technicians are prepared to quickly and efficiently mobilize to your location at a moment's notice.

“ With unmatched in-house technical teams, expert field services staff, and essential industry partnerships, SunGrid is the leader in quality O&M services that maximizes the value of your BESS investment over the long term.”

SunGrid Solutions is dedicated to powering your clean energy future by focusing on projects scaling from 100kWh to 500MWh within the Energy Storage & Generation space.

Invest in your long-term success with educated energy solutions that directly meet your specific requirements.
